Hi! Ye guide kyun?

Main Tanveer hoon, Computer Science diploma student, aur @its.tanveer.exe par Web Dev & AI ke reels banati hoon. Bahut se students poochhte hain: "kaunse AI tools free hain jo sach mein padhai mein kaam aaye?" Ye list usi ka jawab hai.

Har tool ke saath: wo kya karta hai, kaise use karein (2-3 simple steps), uska free plan kya deta hai, aur official link (click karke seedha khulega). Har free plan Nov 2026 mein tool ki official website/pricing page par check kiya gaya hai. Plans badalte rehte hain, isliye sign up se pehle ek baar link par dekh lena.

Pro tips (zaroor padho)

1 **AI ka answer verify karo**

AI galat bhi ho sakta hai (isse "hallucination" kehte hain). Formula, date, facts aur numbers textbook, teacher ya official source se cross-check karo.

2 **Personal data paste mat karo**

Aadhaar, phone number, password, OTP, bank details ya kisi aur ki private info kisi bhi AI tool mein mat daalo.

3 **Copy-paste nahi, samjho**

AI se samjho, practice karo, phir apne words mein likho. College ke AI/plagiarism rules follow karo; zarurat ho to batao ki AI se help li.

4 **Achha prompt = achha answer**

Context do: "Main diploma CS 2nd year student hoon, mujhe OOPs simple Hinglish mein, example ke saath samjhao."

5 **Free limits smartly use karo**

Har tool ki daily/monthly limit hoti hai. Heavy kaam ke liye 2-3 tools rotate karo, aur pricing page par limits check karte raho.

6 **Official link se hi sign up**

Fake "premium free" apps/APKs se bacho. Is PDF ke links official websites ke hain.
